

## Introduction

Revolutionize decentralized finance with our platform, offering custom indexes, automated management, NFT integration, cross-chain compatibility, and advanced analytics for investors' success.

## Key Features

### **MVP**

inDEX fund on any EVM particular chains for the top 100 tokens

### **Loyalty Rewards Program**

Incentivize users with bonuses for holding and staking index tokens long-term

### **Customizable Index Creation**

Users craft unique indexes with chosen tokens and weightings for strategies

### **NFT Rewards for Staking**

Reward NFTs based on staking duration, with airdrops on initial investors

### **Staking & Unstaking tokens**

Whenever possible, automatically stake and unstake the bought tokens

### **Social Trading**

Copy portfolios of top investors for seamless and informed investment strategies

Elevate your investment journey with our decentralized fund platform—innovative indexes, automated management, and seamless cross-chain compatibility for unparalleled success.

## Use cases

Investors seeking passive income want to maximize their returns without actively managing their portfolios. Our platform enables users to achieve this through automated yield farming.

## Use cases

Investors experience consistent returns without the need for constant monitoring, providing a hassle-free and lucrative investment strategy.

## Tokenomics

# *AT LAUNCH*

<b>ENTITY</b>	<b>SUPPLY</b>	<b>MARKET CAP</b>
DEVELOPMENT	250.000.000	\$100.000
PRIVATE SALE	250.000.000	\$100.000
PUBLIC SALE	150.000.000	\$150.000

<b>TOTAL TOKENS</b>	1.000.000.000
<b>PRIVATE SALE PRICE</b>	\$0.0004
<b>PUBLIC SALE PRICE</b>	\$0.001

Elevate your investment journey with our decentralized fund platform—innovative indexes, automated management, and seamless cross-chain compatibility for unparalleled success.

## Security and Compliance

Our platform is built on a decentralized architecture, distributing critical functionalities across a network of nodes. This ensures that there is no single point of failure, reducing the risk of hacking or unauthorized access associated with centralized systems.

We prioritize the protection of user data. Our platform follows best practices for data encryption and storage, ensuring that sensitive user information is secure. Privacy and data security are fundamental aspects of our commitment to user trust and compliance with data protection regulations.

Our platform is designed to comply with relevant regulatory standards in the jurisdictions where we operate. We work closely with legal experts to ensure that our operations adhere to local and international regulations, providing users with a secure and compliant investment environment.

Our development team comprises seasoned professionals with an active security portfolio. These experts have a proven track record in the blockchain and security space, having contributed to and secured various decentralized projects. Their experience and commitment to security are reflected in the robustness of our platform.

Our commitment to decentralized principles, adherence to compliance standards, and the active security portfolio of our development team collectively contribute to providing users with a secure and trustworthy investment platform.

Empowering your decentralized journey with innovation, security, and seamless cross-chain functionality. Join us and elevate your investment experience today!
